Education

Ateneo de Manila University Manila, Philippines
Bachelor of Science in Computer Science *Expected May 2028*
- Named to **StellarPH PH100 2026**, recognising 100 of the brightest minds under 30 in the Philippines

Experience

Casper Studios Manila, Philippines
AI Engineering Intern *Oct 2026 – Present*
- Replaced manual contract drafting with Atlas, a Slack agent that assembles a full contract and statement of work from **117** plain-language rules, turning a multi-hour task into **3m20s** end to end at **48¢** a draft
- Proved the drafts safe to send by blind-testing against signed contracts, keeping **20/20** legal paragraphs intact and every issue it raised genuine, at **78–91%** field accuracy on standard deals
- Shipped with no rule failures by verifying all **762,048** answer combinations and **341** traced rule paths pre-release, letting the team change contract wording without touching code
- Cut manual call-to-project triage by building matching that asks a human rather than guessing when unsure, hitting **97.8%** precision across **219** labelled meetings

Swarm Manila, Philippines
Software Engineer Intern *Jul 2026 – Present*
- Built a cross-framework compliance graph over **2,711** requirements from **7** privacy and security frameworks, including GDPR, the Philippine Data Privacy Act, and NIST CSF 2.0
- Derived **2,182** scored links between equivalent controls, so evidence gathered once can be reused against another framework instead of collected again

NextPay (YC W21) Manila, Philippines
Product Engineering Intern *Sep 2025 – Present*
- Led AR/invoices migration across **8** product surfaces, including invoices, reports, portal, settings, admin, dashboard, and app-shell routing
- Cut median API requests by **15.6%**, payload transfer by **12.9%**, and workflow duration by **4.5%** across repeated invoice and dashboard benchmarks
- Eliminated **100%** of duplicate and failed API request groups by standardizing TanStack Query keys, caching, workspace routing, and targeted invalidation
- Added paginated/date-filtered transaction and posting APIs with **3** service methods and **3** unit-test suites

Bytespace San Francisco, CA (Remote)
Product Engineer, Full-time *May 2026 – Jul 2026*
- Shipped **25+** Bot0 product and infrastructure changes in **6 weeks** across agents, integrations, auth, workspace flows, and customer-facing UX
- Built Bot0's paid-workspace controls across workspace creation, seat limits, team invites, permission checks, and paywall enforcement

Projects

Ateneo Student Tools Suite *Aug 2024 – Present*
Personal projects
- Grew QPI Calculator and Enlistment Helper to **35K** users and **445K** events from Dec 2024–Jul 2026
- Generated **41.9K** Google clicks, **153K** impressions, and **27.3%** CTR; ranked **top 2** for core QPI searches

One Big Match *May 2025 – Dec 2025*
Full-stack matching platform
- Piloted matching platform across **4** org mixers and **80+** users; shipped **15+** fixes from pilot feedback

MISA Registration System *2024 – 2025*
Internal event tooling
- Built registration/check-in tooling for **525** members across **15+** org events, cutting on-site check-in time by **75%** and adding live attendance tracking

Skills

Languages: TypeScript, JavaScript, Python, Swift, Kotlin, HTML, CSS
Tools: React, Next.js, TanStack Query/Router, Node.js, PostgreSQL, Convex, Supabase, SwiftUI
